

Description

Spes Medica adhesive electrodes have a special shape and a specific size studied to allow a perfect registration also on smaller muscles.

The innovative Hydrogel solid gel is developed especially for this application and gives to the electrode a stable adhesion on the skin and it can be repositioned several times without the risk to dirt the patient's skin.

- High quality recordings due to low impedance;
- Indicated for long-term testing;
- The electrode is made by biocompatible soft materials that give the best comfort to the patient;
- Available different shapes and sizes to allow a perfect registration also on smaller muscles.
- Easy TAB handling
