

Description

Designed for cortex stimulation. The handgrip has a clear indication of the polarity of the electrodes. The ball and the shaft are a single piece of stainless steel perfectly tooled to give the best stability and safety. The ball is available in 2 mm diameter. The shaft is fully isolated for a precise stimulation point.

- Light and ergonomic handgrip;
- Safety connector 1,5 mm DIN 42802.

Specifications

Environment

Electrode	Stainless Steel
Electrode insulation	PVDF
Handgrip	PS
Lead wire	Cu/Sn with PVC jacket
Connector	CuZn with PVC jacket
Packaging	Medical paper/PET-PE
Biocompatibility (UNI EN ISO 10993)	Yes
Sterilization method	Ethylene oxide (EtO)
Latex	No
Phthalates	No
Generic code	SI2BXXXXXXXXXD
Probe diameter	2 mm
Probe length	30 mm – 100 mm
Model	Straight
Cable length	250 cm
Connector	1,5 mm T.P. connector DIN 42802
RoHS II	✓
REACH	✓
